For several of the seasonal properties access can be gained to the well, but no electric or access to inside plumbing is possible. For example, the pictures attached show a well near the Burman House on the East side of the lake. The well is likely a sandpoint.

Hi Kristen,

I don't have the final sampling plan yet, but may get it soon. With travel next week for our meeting, the schedule may slip if I can't get approvals back to my contractor in time. I will make sure to send it when it comes in.

We haven't sent any results to owners yet but will include both rounds after we finish the round this summer.

I'm not sure I understand your message about the 3 locations for a well. Can you be more specific? We do have a plumber in the contract just in case one is needed.

Thank you.

Good Morning Bob,

This timeframe will work. The samplers will need to be able to sample from a well at up to 3 locations.

Work on the Reservation

Please provide a sampling plan documents prior to the event. We need to make sure the analysis includes all COC. In the past, EPA sends well results to the owners of sampled private wells. I understand you were planning on doing this. Please provide a copy of sent results for our records/tracking.

Hi Kristen,

Please see the message below. I told them I would check to see how much lead time you need to help coordinate sampling dates with the residents. We can push it into August if the end of July is too soon.

Thank you,

Bob

For the purposes of scheduling, do you know what kind of time frame will be required for acquiring access to properties for sampling? CWE is currently available during the last week of July.

Thank you,

--Matt
